DIVISION OF
OIL GAS & MINING

RE: Permit # ACT 015-032
Genwal Coal Company
Underground Drill Holes

Dear Mr. Haddock:

As was discussed previously with Dave Darby, Genwal has rescheduled drilling of the two additional in-mine wells for the week of November 11th. Genwal has committed to drilling these two additional in-mine groundwater monitoring wells in Lease ML-21569 to more accurately delineate the potentiometric surface and effects of mine dewatering on the hydrologic system.

A delay from the original August schedule was necessary to allow for the development of Genwal's Main North section.

The final location for both in-mine holes will be coordinated with DOGM prior to drilling.

If you have any questions or comments please call.

Sincerely;

R. Jay Marshall
R. Jay Marshall P.E.
Chief Engineer
Genwal Coal Company
